

through 2 - 3/4" pieces of plywood and the VAP™ out penetrated the competition's carbon arrows by over 20 inches, basically stopping at the vanes. Now with the VAP™ hunters don't have to compromise. We can shoot a tougher, lighter, faster, more accurate arrow that will out penetrate heavier arrows by a huge margin, even with expandable broadheads".

VAP™ arrows feature Victory's new patent pending, Penetrator™ Insert that provides a stronger, sleeker fit for both target points and broadheads. The streamlined Penetrator™ Insert available in 5/16 and a 9/32 will enable archers to go directly from Gold Medal target/field point accuracy to maximum broadhead performance. The new Penetrator™ Insert - Easier to work with, increased aerodynamics and broadhead ready.

Features:

- Made with high modulus, 100% carbon fiber
- All VAP™ arrow shafts come with Penetrator™ Inserts and Bohning nocks. Also available LumeNok.
- 6 + " additional penetration (compared to standard diameter hunting arrows)
- Better FOC with the Penetrator™ insert
- 60% less surface area = less drag and wind drift
- Weight +/- .50 grain per dozen
- Available in 300, 350, 400, 500, 600, 700, and 800 spines

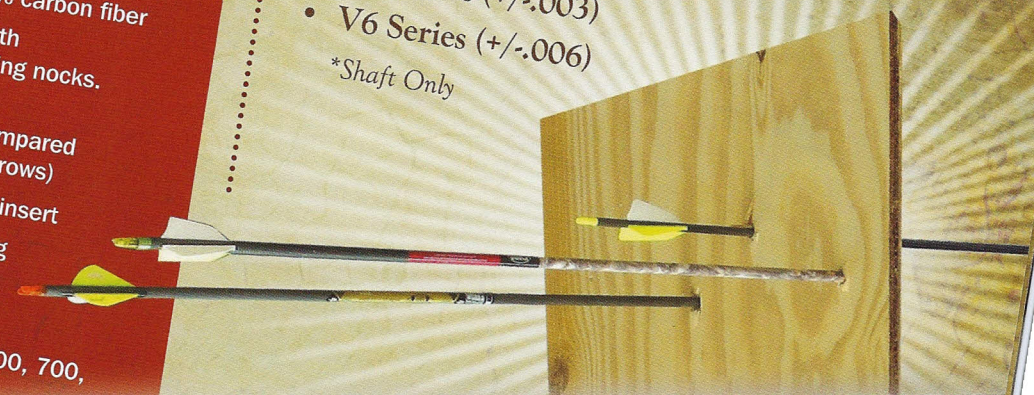

VAP™ Penetrator™ Insert system provides excellent alignment and downrange energy.

VAP™ (Victory Armour Piercing)

Straightness Tolerances:*

- V1 Series (+/- .001)
- V3 Series (+/- .003)
- V6 Series (+/- .006)

*Shaft Only
